

# IRCSTube

16/02/2016

# The Project

Social Sharing of procedures using screen recording.

Ruben Puentedura <http://www.hippasus.com/rrpweblog>

# Collective repackaging of information (project rationale)

- Amplify traditional instruction delivery
- Improve workflow
- Enhance collaboration between staff
- Support a holistic learning approach (promoting critical thinking, confidence and independence)

# Breaking into a new territory (design overview)

- Modules for conversion- not everything could be converted into new format
- Short screencasts for single concept - need to know v nice to know
- Principles of design an effective multimedia learning

# Progress

Reviewed various screen capture and recording tools : Each has different attributes

- Jing (Free version)
- Screencast o matic (Free version)
- CamStudio (Free version)
- Echo360 Personal Capture (Full version. Superior. Branded at VU as “ReVU”. Integrated with VU Collaborate)

# Progress

- Discussed hosting possibilities with Digital Services
  - LibShare (Consider file format and size)
  - VU Library Vimeo channel, p/w protected
  - Library “Y” drive (least favoured)

# Demonstration

IRCSTube

Welcome to IRCS Tube! This site contains 'How to' videos for common acquisitions and serials tasks.

For help in using IRCS Tube please see: [How To Use This Library](#)

# What is next?

- Technical issues
- Training materials
- Roll out to other staff

# What have we learned?

- Multimedia Literacy
- Hypertext Literacy
- Wikis and other Web 2.0 tools
- Learning Management Systems
- Social Sharing
- Collective Intelligence
- Models for thinking about technology - SAMR
- Normalisation
